

Join us for five FREE and fantastic workshops to transform your garden into a Watershed Friendly Garden!

Get the Basics on Saturday, September 12th and come to the Watershed Basics Class to get oriented with your landscape. We will provide an introduction to the essential principles of the watershed friendly approach and how to apply them to your property.

Then, come and get your hands dirty!

Site Evaluation Workshop

You will learn how to take the first step in turning your yard into a Watershed Friendly Garden. Evaluate your current landscape's strengths and weaknesses, develop a plan to reduce runoff on your property, and improve the soil.

Saturday, September 26th

Design Workshop

You will be given an opportunity to bring your site plan and design to a professional for review. We will help you understand a landscape, create a watershed wise list of plants and create strategies for overcoming obstacles.

Saturday, October 10th

Sheet Mulching & Grading for Rainwater Capture Workshop

You will learn how to remove your lawn without the use of chemicals. Discover how to build rich, healthy soil, the foundation for all Watershed Friendly Gardens, using the sheet mulching method.

Saturday, October 17th

Planting & Irrigation Workshop

You will learn how to ensure that the new native plants in your Watershed Friendly Garden thrive. You will understand how to reduce your landscape water use by installing a drip irrigation system on your own.

Saturday, October 24th

Each workshop is from 9am to 12pm, Ventura County Gov't Center 800 S. Victoria Avenue, Ventura Pacific Conference Room (Next to the Hall of Justice Cafeteria)
